

Creative's Accelerated Learning Services™ The "Brain Fitness Program"

Creative's Accelerated Learning Services™ (CALs) is an intensive individualized program that addresses learning challenges and differences. CALs utilizes leading modalities to achieve measurable improvements over a short time. CALs may combine Sensory Integration, Brain Builder®, Interactive Metronome™, Visual Vestibular Therapy ("Astronaut Training"), Vision Skills Training, and Listening Therapies. We schedule sessions frequently to optimize learning new material. The activities are enjoyable and challenging to improve attention, concentration, and focus in a short amount of time.

CALs targets children with learning differences and cognitive challenges while customizing a program to fit each client's schedule. The program and schedule for each child is unique; a typical program lasts between 12 and 15 sessions attended three to five times a week. This intensive program is flexible enough to accommodate the most challenging schedules.

Service Delivery

1. Suggestion by the client's therapist or expressed client interest.
2. A therapy session devoted to discussion between parents, child, and Creative covering programs, options, suitability, and relevance.
3. Program duration of three to five weeks.

Fees and Responsibilities

Health insurance usually covers the CALs program. Creative will provide a cost estimate prior to program initiation.
